Communal Doors • Entrance Panels • Controlled Access Doors

Leading manufacturer and supplier of communal access and security doors.

Supplying the UK market for over 30 years, Newton Security Doors is a leading manufacturer and supplier of communal access and security doors for the social housing and public building sectors.

Developed in partnership with police, architects and clients, Newton's range of communal access and security doors are designed to withstand heavy traffic, whilst meeting both visual and security requirements.

With a 1 year manufacturer's warranty on hardware, and a 2 year fabrication warranty, our doors provide reliability, and require low maintenance. Secured By Design and LPCB accredited options are available, providing proven security and durability.

Newton doors are polyester powder coated in a wide range of high quality colours and finishes, as standard. All doors are manufactured in the UK, and we offer nationwide delivery and installation services.

CLASSIC^{AL}

LPS 2081: Issue 1 SRB
Cert ref. 312m

Secured by Design

Police Preferred Specification

SECURED BY DESIGN AND LPCB ACCREDITED ALUMINIUM COMMUNAL DOORS, WITH ENHANCED STRENGTH AND CORROSION RESISTANCE, AND A 10 YEAR ANTI-RUST WARRANTY

Constructed from reinforced aluminium and stainless steel, the Classic^{AL} combines superior strength and vandal resistance, with a sleek, contemporary appearance.

Supplied with a 10 year anti-rust warranty and 2 year fabrication warranty, Classic^{AL} provides enhanced corrosion resistance, and is the most cost-effective choice. Using lightweight materials means the Classic^{AL} is also easier to install, and can weigh up to 60% less than a similar steel door.

Designed to meet rigorous requirements, Classic^{AL} doors are Secured by Design accredited, and LPCB certified to LPS 2081 Security Rating B.

Classic^{AL} is available with a variety of locking options, including Secured by Design approved high quality maglocks with integral surge protection, and panic escape push bars.

Classic^{AL} is made to measure, and offered in 16 different single and double door configurations, including a fully glazed option. The Classic^{AL} range offers both single and double doors, with optional side, overhead or standalone panels, with customisable solid and glazed infills.

Due to its inventive design, the Classic^{AL} is precision engineered to be manufactured in Newton's shortest lead time.

CLASSIC2

Secured by Design

Police Preferred Specification

VERSATILE STEEL COMMUNAL DOORS, SUCCESSFULLY TESTED BY THE LPCB, WITH SECURED BY DESIGN ACCREDITATION, AND A 2 YEAR WARRANTY AGAINST CORROSION

In recognition of the need for attractive entranceways that withstand heavy use and vandalism, Classic2 communal doors have been designed to combine appearance, durability and value.

Combining traditional features with a number of new design elements to produce the ultimate steel communal door, the Classic2 is the best-performing, most cost-effective door of its class.

Weather tested, and tested to withstand 100,000 operational cycles, the Classic2 has proven durability, and is supplied with a 2 year anti-rust warranty.

Providing certified security, Newton's Classic2 communal doors are a Secured by Design accredited 'Police Preferred Specification,' and have been successfully tested by the LPCB to PAS 24.

Classic2 communal doors are available in 18 different design configurations, with optional side, over or standalone panels, and customisable solid and glazed infills.

The Classic2 is easy to install, with a patented auto-aligning mounting system, and has a lightweight operation that is compliant with the opening forces requirement of BS8300.

STAINLESS STEEL COMMUNAL DOORS, IDEAL FOR EXTREME ENVIRONMENTS

The Classic2^S is constructed from stainless steel, giving all the advantages of the Classic2, with enhanced corrosion resistance and robustness, making Classic2^S communal doors particularly ideal for coastal locations.

With 18 different design configurations, the Classic2^S is visually identical to Classic2 communal doors, so they can be used in conjunction to meet differing levels of risk.

Classic2^S communal doors are available fitted with a range of high quality locking options, and are supplied with a 2 year fabrication warranty, and a 10 year anti-rust warranty.

ACCREDITATIONS

Secured by Design is the official UK Police flagship initiative, combining the principles of 'designing out crime' with physical security, creating high level security standards.

A security product is awarded Secured by Design status when it demonstrates its effectiveness in preventing or reducing crime, through passing standards and tests nominated by the police service, usually by resistance to physical attack.

The Loss Prevention Certification Board (LPCB) offers third-party testing of products, confirming that products meet a certain criteria, and providing a certified standard of security.

LPS 2081 and PAS 24 evaluate the resistance of physical security products when targeted by intruders using stealth. LPS 2081 Security Rating B testing simulates an opportunistic attack using tools such as a bolt cutter, and pipe wrench.

Supplying communal doors to
social housing and public sector
clients for over 30 years.
